IATI's - Digital Health  
Hackathon 2019

# Our story

There are several personas, the main story:

- ▶ Patient enters a hospital
- ▶ A route is set for him

# The Challenge

Hospitals are hard navigate.

Stressed patients in emergency conditions

Unknown route and timings

The solution:  
*one app for all!*

# The solution cont.

Dynamically updating treatment view

Treatment navigation indoor and outside

Walking time estimations

Disabilities support by Voice & vibration

Schedule notifications

Wait time estimations (queue system integration)

Medical emergency button for in route trouble

Wait time optimization

# Hackathon - Demo

## ▶ Client side (mobile application)

- ▶ We used  Indoor Mapping platform for the creation of new digital services inside buildings.
  - ▶ We used Google Campus building as a demonstration of health care center
- ▶ We added  the ability to get starting point and destination using API and not only by search box .
- ▶ We also added  the waiting time for each
